Dear Sarah,

I hope you don't mind me writing to you. You probably don't remember me, but we met about three years ago. My sister Vtasta used to work as an au pair for the family next door to you and I visited her for a week. We both went to a barbecue at your house. Your dad set fire to a tree in the back garden and had to call the fire brigade. I'm sure you remember that!

Anyway, I'm writing to you now because Vtasta remembers that your parents are both lawyers. I'm studying Law at university here in the Czech Republic. It's a five-year course, and I'm just about finish my second year. I've decided to spend next year working in the UK, partly to improve my English and partly to earn some money . Could your mum or dad give me any advice about how to get a job in a law firm? I'm prepared to do any kind of work - t don't mind making tea!

I'm enclosing a recent photo of me, Vtasta and two friends of ours. Vlasta is the girl with long, blond air (it used to be dark.). I'm the one on the left, with short, dark hair and a long-sleeved T-shirt'.

Best wishes

Everyone wants a job that pays well. Some people stop school early because they want to start earning cash right away. Others spend years and years studying in school in order to get a better job. Which is best? Actually, studies show that in most jobs, the higher your education, the higher your earning power.

If you stay in school, you can make more money. A person who goes to college and gets a bachelor's degree can make an average of \$52,200. With a master's degree, he or she can make about \$62,000. And studies show that if a person gets a PhD, he or she can make \$89,000 or more a year.

Do you ever think about what schools will be like in the future? Many people think that students will study most regular classes such as maths, science and history online. Students will probably learn these subjects anywhere using a computer. What will happen if students have problems with a subject? They might connect with a teacher through live video conferencing. Expert teachers from learning centres will give students help wherever they live.

Students will still take classes in a school, too. Schools will become places for learning social skills. Teachers will guide students in learning how to work together in getting along with each other. They will help students with group projects both in and out of the classroom.

Volunteer work and working at local businesses will teach students important life skills about the world they live in. This will help students become an important part of their communities. Some experts say it will take five years for changes to begin in schools. Some say it will take longer. Most people agree, though, that computers will change education the way TVs and telephones changed life for people all over the world years before.
